

Corey Kogan

FULLSTACK DEVELOPER

coreykogan@gmail.com • 609-339-8427 • coreykogan.dev • github.com/kogan007 • linkedin.com/in/corey-kogan

Full Stack Web Developer with a focus on creating responsive and accessible web applications using the latest technologies in the industry. Proven track record of creating websites that consistently show great profit for clients by being fast, SEO friendly, and providing a great user experience.

EXPERIENCE

Web Developer at Rhone Apparel

Stamford, CT • Mar 2023 - Present

Utilized Shopify and Vue.js to create and maintain dynamic, high-converting online shopping experiences.

- Worked with cloudflare and cloudflare workers to deploy bleeding edge static headless builds.
- Implemented features that lead to significant increases in site performance and user experience.
- Fully rebuilt the category pages, implementing infinite scroll and a rehashed filter and sorting experience.
- Worked on a refresh of product pages, involving a more modern design and optimizations for site performance.

Full Stack Web Developer at MakDigitalDesign

Philadelphia, PA • Jun 2019 - Feb 2023

Worked on a team of 5 as a full stack web developer, creating applications using the latest web technologies for B2B and B2C businesses.

- Developed ecommerce storefronts on Bigcommerce using Stencil and headless full-stack applications using Gatsby.js, NextJS, and Remix.run.
- Worked on various projects, including headless websites, custom react components, and stencil themes.
- Regularly guided and led junior developers, helping them accomplish their goals.

PROJECTS

Rhone.com Worked on a team utilizing Vue.js for improving the user experience for Rhone, a modern men's clothing brand.

Byourbed Created a headless website on remix.run for a multi million dollar brand. Used typescript, reactjs, and Bigcommerce to power the backend. Remix.run powered the mutations and API conversions to bigcommerce.

CoolFrames Developed a headless website with a Bigcommerce backend using Remix.run, Redis, and PostgreSQL. Built a custom flow for picking out lenses and integrated with 3rd party APIs, including Luna, a service for glasses scans.

Phastek Performance Engineered custom react components for picking car make and model, as well as a custom react side cart, built on top of the bigcommerce stencil framework.

GlowbackLED Created a custom Stencil Bigcommerce theme and custom react components. Also developed a custom react based category page for a streamlined filtering experience.

Springbok Puzzles Built a headless React website on Gatsby.js with a Bigcommerce backend and hosted on AWS.

U.S Flag Store Architected an implementation of the bigcommerce API in conjunction with gatsby.js, and deployed on AWS.
